

Paul Pessoa

Frontend Engineer – React

Recife Brazil (GMT-3) | paulmpeessoa@gmail.com | +55 (81) 99509-7377 | linkedin.com/in/paulmpeessoa | github.com/paulpessoa

PROFESSIONAL SUMMARY

Frontend Engineer with 6+ years building data-driven web applications for fintech and enterprise products. Strong expertise in React, Next.js, and TypeScript, with proven ability to own features end to end while collaborating across product, design, and backend teams. Combines technical depth in performance optimization and data visualization with international team experience across LATAM, USA, and Europe.

SKILLS

Programming Languages: React.js, Next.js, TypeScript, JavaScript (ES6+)

Frontend Technologies: HTML5, CSS3, SASS, Tailwind CSS, Highcharts, ShadcnUI

State Management & APIs: Context API, Zustand, Tanstack Query, REST APIs, GraphQL, Axios

Testing & Infrastructure: Jest, React Testing Library, Cypress, GitHub, CI/CD, AWS, Azure, Supabase

PROFESSIONAL EXPERIENCE

Frontend Engineer - TRAIVE FINANCE Remote | USA

February 2025 – November 2025

Technologies & Tools: React, Next.js, TypeScript, TailwindCSS, GraphQL, REST APIs, Clarity, Datadog, Clarity, POSTMAN

- Implemented a B2B Ag-Fintech platform, supporting \$50M+ in monthly agricultural credit operations across 20+ financial institutions in LATAM.
- Optimized key marketplace features using React, Next.js, and TypeScript, resulting in a ~40% improvement in page load performance and ~30% reduction in unnecessary component re-renders.
- Collaborated with 20 engineers across Brazil and the US (Product, Design, Backend) to modularize credit/risk workflows into reusable frontend modules.
- Led the active migration of 100+ API endpoints from GraphQL to REST, simplifying data flow and enhancing the reliability of critical financial operations.

Frontend Engineer - GEP WORLDWIDE Remote | USA

July 2023 – January 2025

Technologies & Tools: Next.js, React, TypeScript, Highcharts, i18n, ShadcnUI, Stripe, Supabase, Zustand, Amplify

- Delivered enterprise procurement intelligence platforms used by 400+ global organizations, including 25+ Fortune 500 companies.
- Designed interactive analytics dashboards using Highcharts to translate 100,000+ global cost indices and 4,000 predictive models into actionable procurement insights used by 500+ users.
- Optimized critical API response times from minutes to seconds (500ms–5s), in partnership with Backend teams and AWS optimizations
- Integrated into a distributed engineering team with 14 developers in the United States, India, and Brazil, collaborating on large-scale enterprise software development.
- Shipped 20+ product increments (features/dashboards) across Enterprise + Lite during the redesign rollout

Frontend Engineer - LOCUS CUSTOM SOFTWARE Remote | Brazil

October 2022 – March 2023

Technologies & Tools: Vue, Angular, Next.js, TypeScript, JavaScript, HTML, CSS, Azure, Jest, Cypress, React Query

- Delivered frontend solutions across 3 client projects in fintech, retail, and digital services within a software factory environment
- Implemented ERP and POS interfaces used by thousands of retail merchants across Brazil, supporting inventory management, sales operations, financial control, and fiscal compliance.
- Independently refactored and shipped an internal API testing/automation tool under a short deadline, improving debugging turnaround by ~80%.
- Designed responsive Vue.js interfaces supporting high-frequency daily retail transactions across distributed store environments.

Frontend Engineer - PREDIFY (NEOGRID) Remote | Brazil

May 2022 – October 2022

Technologies & Tools: React, TypeScript, Highcharts, Vuetify, Zustand, SAAS, Vue, HTML5, WordPress, JIRA, Gitea

- Engineered pricing intelligence platform serving 250+ enterprise clients and 1000+ active users across retail, manufacturing, and distribution.
- Analyzed large-scale pricing datasets supporting \$100M+ in product pricing strategies across multiple industries.
- Led internationalization (i18n) implementation enabling expansion into multiple international markets.
- Migrated legacy AngularJS modules to Vue, reducing technical debt and improving long-term maintainability.

Application Development Associate - ACCENTURE | Remote | Brazil

July 2021 – May 2022

Technologies & Tools: SAP BW, SQL, HTML, CSS, React.js, JavaScript, jQuery, ABAP, JQuery, JIRA, SCRUM

- Provided Level 2 support for SAP BW enterprise data platforms serving multinational clients including Gerdau (US operations) and SQM (Chile).
- Resolved 5+ daily production incidents and client requests, debugging data pipelines, reports, and integration workflows within strict SLA requirements.
- Worked with SAP BW, SQL, ABAP-based systems, and web technologies to troubleshoot enterprise reporting and analytics solutions.
- Supported large-scale industrial data pipelines and reporting systems processing high-volume operational data across global manufacturing environments.
- Built an internal MVP web tool using Java and Spring Boot, improving internal engineering workflows and assisting onboarding of a junior intern.

EDUCATION

Postgraduate Degree in Software Architecture - UNOPAR (Universidade Norte do Paraná | Brazil) | November 2026

Postgraduate Degree in Digital Projects / Products - UNOPAR (Universidade Norte do Paraná) | Brazil | November 2025

Bachelor's Degree in Information Systems - FAM (Faculdade das Américas) | Brazil | December 2024

MBA in Project Management in Information Technology - UNICIV (Faculdade Eficaz) | Brazil | January 2020

Bachelor's Degree in Business Administration - Centro Universitário Estácio | Brazil | June 2019

LANGUAGES

English (Fluent), Portuguese (Native), Spanish (Intermediate)
